PROJECT DESCRIPTION:

The Free Skill Development & Job Readiness Program is a social impact initiative designed to empower unemployed youth, students, and underprivileged communities by providing them with free access to practical skills, career training, and employment support. The program aims to bridge the gap between education and industry requirements by offering job-oriented courses, hands-on training, and personalized career guidance.

Through a combination of online learning, AI-powered tools, and community-driven support, the program helps participants develop essential skills in areas such as digital literacy, communication, technical skills, soft skills, and job readiness. By removing financial barriers and ensuring accessibility, the initiative creates equal opportunities for learners from all socioeconomic backgrounds.

The platform offers features such as self-paced learning modules, real-time doubt solving using AI chatbots, resume-building tools, mock interview practices, and job-matching support through partnerships with companies and NGOs. The ultimate goal of the program is to enable learners to gain confidence, become employment-ready, and secure sustainable livelihood opportunities.

This project contributes directly to SDG 4 (Quality Education) and SDG 8 (Decent Work & Economic Growth) by making education inclusive and helping participants transition into meaningful careers.

THANKYOU IBM
